

Protect your investment & stay **online** with quality hosting

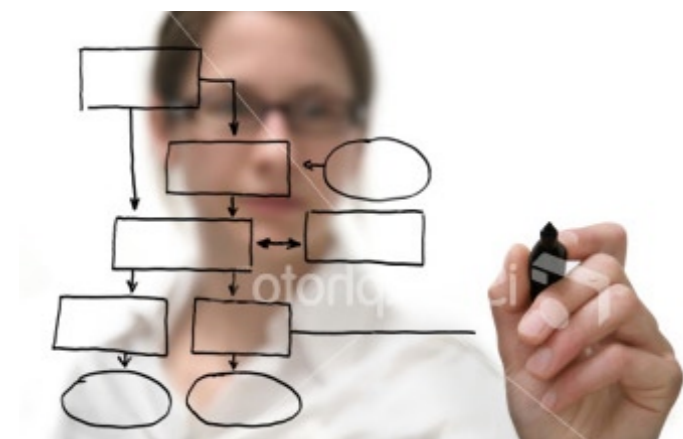

High quality hosting services are an essential aspect to any business that relies on online services (primarily web, email and remote backup). Kinetic provide a first class solution for your hosting requirements. Our managed facilities located in Australia and Hong Kong (soon to open) offer numerous services that can be customised for your requirements. Secure e-commerce systems to complete corporate email facilities management. Contact us and discover why more companies utilise Kinetic Design hosting solutions.

Our Groupware Solutions

As you know, email has changed the way business communicate both internally and externally. The flow of information bounces around at speeds that just a few years ago seemed impossible. This is now a basic expectation in personal and professional communication.

Kinetic Design's Groupware solutions go beyond basic email hosting. We give you the ability to share and edit documents, calendars, tasks and even address books. Not to mention instant messages between online users in the next office or even in a different country.

Mail and calendar services also sync beautifully with mobile devices. Imagine having complete email and calendar synchronisation between a laptop, mobile and desktop for your entire workforce. That is the power of our Groupware Solutions.

Website Hosting Packages

All our web hosting packages provide lightning fast and reliable service. Our managed servers allows us complete control over efficiency, capacity and security.

Our web hosting service provide industry standard platform technologies, Apache, MySQL, and PHP all running on highly efficient and secure Linux operating system. We are able to manage and include a number of extensions on a per-client basis, a flexibility which very hosting facilities few can offer.

By combining our experience with hosting and developing websites our clients benefit from seamless integration between website development and web hosting. What this means is, your site will be optimised to run on our system, and will be faster and more reliable when we manage both aspects of your website. A highly recommend situation for our clients.

Generous bandwidth and storage allowances, provide a solid foundation for us to integrate advanced website functionality to our clients including automated file transfer, marketing solutions and e-commerce modules. All operating in a familiar and centralised location.

Offsite Backup - Critical Data

Perhaps the single biggest IT mistake that businesses make is not having a backup strategy... until it's too late. Different businesses require different strategies for data backup, depending on there usage paterns; onsite, offsite, online, offline, incremental etc. Kinetic Design

have developed and implement a range of different hosted offsite solutions based on available bandwidth, frequency and ability to integrate in your existing workflow. We also provide solutions for onsite backup and long term data storage. Contact us with your requirements and we can develop a solution to best fits you situation. And rest assured your data is safe.

Domain Names

A cleverly crafted domain lifts your professional image and provides a channel of communication with your audience, via the website or email. Often overlooked, domain name hosting and configuration is essential. A mis-configured domain can easily take your website and email off line.

Fortunately, Kinetic Design have the experience and knowledge to manage all aspects of your domain name management. With our domain name servers, we can ensure your domains is hosted safely, correctly configured and 100% reliable. So all you have to do is worry about what name to choose.

Data Centre Facilities & Virtual Machines

If you require a web server or email server but lack the budget to invest in new hardware and dedicated data links. Kinetic Design can provide a virtual server hosting solution. We can provide a virtual server that can scale with your growth. Adding computing resources, like RAM and HDD storage can be allocate quickly and easily, without the hassle of re-installation.

Contact us to find out more about how a hosted virtualised solution can benefit your company.
